

RAKSHA

AI/ML Engineer | Python, RAG & Generative AI Systems

Jhajjar, Haryana, India | +91 95182 52924 | rakshachahar336@gmail.com | linkedin.com/in/raksha-chahar | github.com/rakshachahar

SUMMARY

AI/ML undergraduate (CGPA 8.86/10) with hands-on experience across three concurrent AI/ML roles — Machine Learning Intern at FlyRank AI, AI Automation & Intelligent Solutions Intern at BharatCares (IBM SkillsBuild), and open-source contributor at GSSoC 2026. Builds production AI systems spanning Retrieval-Augmented Generation (RAG), civic-tech intelligence platforms, and privacy-focused safety applications — including a RAG pipeline retrieving across 500+ document chunks (FAISS, LangChain) and a Google Gemini-powered civic issue classifier. Active GitHub contributor with 160+ contributions in the past year.

CORE SKILLS

- Languages: Python, SQL, C++, JavaScript, TypeScript
- GenAI / LLM: RAG, LangChain, Prompt Engineering, PyTorch, LLM API Integration (OpenRouter), Google Gemini, AI Agents (Google ADK)
- Vector Search & NLP: FAISS, Sentence Transformers, Semantic Search, Embeddings, NLP
- ML / Data: NumPy, Pandas, Matplotlib, Model Evaluation
- Tools & Platforms: Git, GitHub, VS Code, Postman, REST APIs, Geospatial Analysis

EXPERIENCE

Machine Learning Intern — FlyRank AI | Jul 2026 – Present | Remote

- Contribute to machine learning workflows and applied ML engineering practices across production AI projects
- Build Generative AI applications in Python spanning RAG pipelines and LLM-based systems
- Apply data processing, model evaluation, and AI system design principles in a live engineering environment

AI Automation & Intelligent Solutions Intern — BharatCares (IBM SkillsBuild, with AICTE) | Jun – Jul 2026 (6 weeks) | Remote

- Conceptualized EduAgent AI, an AI-powered learning assistant, as part of a 6-member team for an AI-for-Education initiative
- Designed a personalized academic support and study-planning concept, translating an open-ended AI problem into a structured solution
- Collaborated cross-functionally under IBM SkillsBuild mentorship, presenting the final concept to program evaluators

Open Source Contributor — GSSoC 2026, SSoC 2026 & Nexus Spring of Code | May 2026 – Present | Remote

- Resolve issues and ship feature enhancements through pull requests across multiple open-source repositories
- Collaborate with maintainers using Git/GitHub workflows, meeting community code-review and architecture standards
- Improve project documentation to support community-driven development

PROJECTS

Scientific Literature Explorer — RAG-based Research Paper Q&A System | Python, LangChain, FAISS, Streamlit, OpenRouter API

- Architected and deployed an end-to-end RAG pipeline for natural-language querying over research papers, engineering PDF ingestion, chunking, and semantic retrieval across 500+ document chunks
- Implemented FAISS-based vector search with Sentence Transformer embeddings to ground LLM responses and reduce hallucination
- Applied prompt compression and retrieval-tuning strategies to improve response relevance and token efficiency
- Deployed a publicly accessible live demo integrating the OpenRouter LLM API through Streamlit; built under Intel® Unnati Data-Centric Labs with faculty mentorship

GitHub: github.com/rakshachahar/scientific-literature-explorer-rag | Live Demo: scientific-literature-explorer-rag.streamlit.app

Community Pulse AI — Civic Issue Intelligence Platform | TypeScript, Google Gemini

- Built an AI-powered civic issue intelligence platform that analyzes citizen complaints using Google Gemini
- Implemented automatic classification of complaint severity, priority, and department routing
- Generated suggested actions from complaint content to support faster civic response workflows

GitHub: github.com/rakshachahar/community-pulse-ai | Live Demo: community-pulse-ai.onrender.com

Anonymous Safety Intelligence System | TypeScript

- Built a privacy-focused platform enabling anonymous incident reporting
- Implemented geospatial analysis and safety analytics to surface incident patterns
- Added SOS event support and an admin moderation workflow

GitHub: github.com/rakshachahar/anonymous-safety-intelligence-system | Live Demo: anonymous-safety-intelligence-syste.vercel.app

ACHIEVEMENTS

- Winner — Elite Her Hackathon 2026 (Influencer & Communication Track)
- Finalist — India Innovates 2026, Bharat Mandapam, New Delhi
- Top 20 National Finalist — Praxis 2.0 (GDG on Campus)
- Top 50 Finalist — Elite Hack 1.0 (900+ teams, 7,500+ participants)
- Finalist — Hack on Titan (GeeksforGeeks)
- Advanced to Offline Round — Hack4Delhi (IEEE NSUT Delhi)

CERTIFICATIONS & PROGRAMS

- Engineer AI Agents with Agent Development Kit (ADK) — Google | AI Fluency: Framework & Foundations — Anthropic
- Machine Learning Cohort — FlyRank AI (July 2026) | Deloitte Data Analytics Job Simulation — Forage
- Postman API Fundamentals — Student Expert | Python Programming — Kaggle Learn

EDUCATION

World College of Technology & Management (WCTM), Gurugram — affiliated to Maharshi Dayanand University (MDU), Rohtak
Bachelor of Technology (B.Tech), Artificial Intelligence & Machine Learning | Expected Graduation: May 2028 | CGPA: 8.86/10.00
